Please find below and/or attached an Office communication concerning this application or proceeding.

Art Unit: 1634

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to an array, classified in class 435, subclass 283.1.
 - II. Claims 6-7 and 10-11, drawn to a method of making an array of proteins, classified in class 435, subclass 68.1.
 - III. Claims 8-9, drawn to a method of evaluating a protein interaction, classified in class 435, subclass 7.1.
- 2. The inventions are distinct, each from the other because of the following reasons:
- a. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method as claimed can be used to make another and materially different product i.e. the method of Invention II can be used to produce an *in situ* hybridization slide sample wherein a slide (substrate) containing cells is provided a binding agent (probe) which hybridizes to an affinity tag (sequence).
- b. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process i.e. the product of Invention I can be used to make arrays comprising complementary sequences via hybridization and hybrid melting.

Application/Control Number: 10/055,432

Art Unit: 1634

c. Inventions II and III are independent and distinct. Inventions are independent and distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation and different functions. Specifically, the methods of Invention II operate by providing a substrate and providing an amino acid-encoding nucleic acid at each address of the substrate and the method functions to provide an array of Conversely, the methods of Invention III operate by providing amino acid-encoding proteins. nucleic acids on a substrate and contacting the substrate with translations effectors and binding agent and the methods function to evaluate protein interaction.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BJ Forman whose telephone number is (703) 306-5878. The examiner can normally be reached on 6:30 TO 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones can be reached on (703) 308-1152. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-8724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
